

Lecture 11 — Fill in the Blanks (Serializers, JWT, Permissions, Pagination)

Practice set for Lecture 11 focused on serializers, JWT authentication, permissions, custom user model, and pagination.

Fill in the Blanks

1. Serialization mode

serializer = AlbumSerializer(_____)

2. Deserialization mode

serializer = AlbumSerializer(_____ = request.data)

3. QuerySet serialization

AlbumSerializer(Album.objects.all(), _____ = True)

4. Validated dictionary

serializer._____

5. Validation errors dict

serializer._____

6. Auto serializer

serializers._____

7. Hidden password field

password = serializers.CharField(_____ = True)

8. SerializerMethodField naming

def _____full_name(self, obj):

9. Field-level validation

def _____duration(self, value):

10. Object-level validation

def _____(self, data):

11. Raise validation error

raise serializers._____

12. JWT header

Authorization: _____ <token>

13. JWT login endpoint

_____.as_view()

14. JWT refresh endpoint

_____.as_view()

15. JWT auth class

'rest_framework_simplejwt.authentication._____'

16. Safe password creation

User.objects._____

17. Custom User extension

class CustomUser(_____):

18. Custom User setting

_____ = 'accounts.CustomUser'

19. Public registration permission

permission_classes = [_____]

20. Pagination size setting

_____: 10

Answer Key

1. album / obj
2. data
3. many
4. validated_data
5. errors
6. ModelSerializer
7. write_only
8. get
9. validate
10. validate
11. ValidationError
12. Bearer
13. TokenObtainPairView
14. TokenRefreshView
15. JWTAuthentication
16. create_user
17. AbstractUser
18. AUTH_USER_MODEL
19. AllowAny
20. PAGE_SIZE
